

# Long-Term Semiconductor Storage

## Securing the future of your builds

We store and fulfill irreplaceable electronic components and semiconductors to protect downstream revenues.

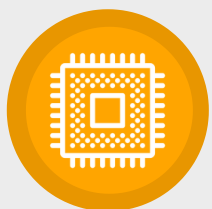

## Custom Vault Storage

Located in Orlando, Florida, the Partstat Vault is rated "best-in-class" for component and raw material storage. Our Vault defends your builds from unexpected supply chain risks, such as natural disasters, and protects your downstream revenues.

### Features

- Fire Rated Class 350 Certification
- Clean Agent Fire Suppression System
- Zone IV Seismic Rated
- Magnetic Shielding and ESD Protection
- 1,100 lb. Vault Door

## Die & Wafer Banking

Our industry-leading activated desiccant dry cabinets create the optimal storage environment for long-term die and wafer banking. These cabinets are also built into our vault storage environment.

### Features

- Self-Regulated Drying Technology
- Zeolite MSL Regulation
- ESD Protection

## Fulfillment

Through our infrastructure and regularly audited processes, we offer manufacturers a customizable global fulfillment solution for critical electronic components and semiconductors.

### Specialized Electronics Handling

- Established ESD, MSL Processes & Protocols
- Manufacturer MOQs Splits to JEDEC Standards
- Baking & MSL Reconstitution to JEDEC Standards
- Testing Coordination: Solder, Electrical, Functional, etc.

### Global Fulfillment

- Picking, Packing, Shipping
- Import/Export Administration
- Freight Administration
- Distribution to OEM Designee(s)
- Invoicing and A/R for OEM Designees (EMS)
